Passionate developer with deep expertise in JavaScript, TypeScript and modern web technologies. Skilled in creating scalable, user-friendly, and accessible applications across platforms such as desktop, mobile, browsers, smart TVs, and cloud environments. Strong problem-solving, debugging, and collaboration skills with a focus on quality, performance, and user experience.

PROJECT AND TOOLING

Video Navigator - Cross-Platform streaming application

Navigator application to consume video on interactive TVs (Samsung, LG, Vizio, GoogleTV), game consoles (Xbox), and streaming devices (Chromecast, FireTV). Supports Live TV, On Demand, and Cloud DVR playback with Dynamic Ad Insertion, trick modes, in-app purchase, recording, and parental controls. Accessibility via Speech Synthesis on TV and NVDA, JAWS, and VoiceOver on web. Responsible for architecting, designing, and developing across platforms; collaborated with clients on requirements, provided estimates, set coding/CI/CD standards, reviewed code, and mentored developers.

Developer Tooling & Team Enablement - Internal tools for developers, QA, and managers

Designed and built internal tools that streamlined the team's development and testing workflow: a cross-platform device launcher, a WebSocket-based remote debugging tool capturing live DOM snapshots and app state, an API mocking and traffic inspection proxy, and an automated device health-monitoring scheduler. These cut device setup and debugging time dramatically and became the team's standard workflow.

HIGHLIGHTS

- **JavaScript & TypeScript:** Extensive experience building applications across modern frameworks and libraries.
- **Cross-Platform Development:** Delivered applications for web, mobile (iOS/Android), smart TVs (Samsung, LG, Fire TV, Android TV), Chromecast, Xbox, and desktop browsers.
- **Accessibility (A11y):** Strong advocate for inclusivity and WCAG compliance using NVDA, JAWS, and screen readers.
- **Automation & Quality:** Proven track record implementing UI test automation.
- **Debugging & Optimization:** Strong ability to troubleshoot, profile, and enhance performance in complex environments.
- **Team Collaboration:** Experienced in Agile workflows, code reviews, mentoring, and CI/CD best practices.

SKILLS

- **Languages:** JavaScript, TypeScript, HTML5, CSS3, Python*, Ruby*, Java*
- **Frameworks / Libraries:** React, Angular, BackboneJS, SolidJS*, Svelte*, LightningJS, Node.js, Bun, Deno, REST APIs, GraphQL*
- **Tools / Platforms:** Webpack, Gulp, Git, GitHub, GitLab, Jira, Kibana, Tableau, Docker
- **Accessibility:** WCAG, NVDA, JAWS, Speech Synthesis
- **Practices:** Agile, Scrum, CI/CD, TDD/BDD, Event-driven & Async Programming, Debugging, Problem Solving

PROFESSIONAL EXPERIENCE

Technical Lead / Functional Specialist - Cognizant - NOV 2015 / now
Technical Lead - itaas - A Cognizant Company - DEC 2007 / NOV 2015
Associate Software Engineer - Spartan Labs Pvt. Ltd. - APR 2007 / DEC 2007
